

FALCON COLLEGE

6 May 2008

## 2 0 0 8

2008 – Another massive challenge for the College, but a Challenge we are confident that we can meet and not just meet, but go forward with confidence.

Our goals on a specific building basis are to make sure that all Form One and Two accommodation has been upgraded and put a plan of action into place for further boarding accommodation upgrade.

We intend finishing the building of the Computer Centre and to have it equipped and working before the year end.

To extend the office accommodation to create new offices for the Headmaster, the Bursar and the Second Master.

To complete the Bursar's new house.

Finally, on the building front, to complete the pig project buildings.

Our academic drive continues and we strive to make sure that every boy does as well as he can academically. We will drive the new Tutor system so that all boys are monitored as closely as possible, in terms of subject choices and their interests.

Sport-wise, we will strive to expose boys internationally at all levels – we will maintain our high percentage of school master coaches and drive hard to keep standards as high as we possibly can keep them.

The College has vast assets in terms of "Education for Life" in the form of experienced staff and wonderful facilities - from the new gymnasium to our environmental area, Quiet Waters. It is our goal to give every boy an experience in all of these areas so that he can make educated choices for himself, once he has left our College.

We have great confidence in our team to be able to take Falcon College to another level in 2008.

Yours sincerely

Reg W Querl  
**Headmaster**
